

△ round
to square

Or

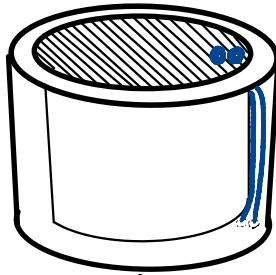

would just put pot on top & assemble, maybe add diode on top for it, then could
make block for sensors to go in vertically to be waterproof or cut holes in side for sideways
insertion. Holes would also need to cut for water tube insertion
or could add in pot @ top where specific cuts could be made & enable wire funneling in wells

rotated

90°

[snug hole in side to protect sensor]

LED (Tape wires to arm)
